

Melane

Afro, Soul, Jazz

after her successful debut album "Four" (ACT) with the jazz trio "Three Fall", Melane has now decided to continue telling her own musical story and to unlock a new world of sounds.

Her lyrics and her music reflect her connection to different parts of her cultural background, as well as her love for different styles and rhythms - the sounds of her cultural roots and home.

The band consists of international musicians, the instrumentation is classic:

Carlos Palmen (bass) and Sebastian Winne (drums) stand for sophisticated and driving grooves. Colin Laroche de Féline (guitar) provides vibrant riffs whereas Gert Kapo (keys) rounds off the sound scape with soulful harmonies.

Melane tells stories and experiences from her life. Stories that move her, that move all of us, find their sound in a multilingual universal music that moves - not only emotionally. Her music is a soulful melange and expression of an universal and global inspiration, that cannot be packed into one genre.

"With her natural charisma and the way she moves, she attracts everyone's attention and puts everyone under her spell. And when you hear them sing, you want to close your eyes and just listen to the harmony of voice and music."
